1. Introduction

1.1 Product Overview

The DA-750 has a comprehensive range of advanced functions, making it an ideal Suction type detector for effectively preventing gas leak incidents in various industrial areas. It is capable of detecting the presence of combustible gas, toxic gas, and VOC (Volatile Organic Compounds) leaks. DA-750 is an essential safety product designed to prevent accidents by detecting gas leaks in industrial settings, particularly in factories and facilities that deal with toxic gases. Its main features include continuous gas detection through the use of a micro pump, enabling gas monitoring even in locations where it is challenging to install traditional gas sensors or manage them effectively. The device promptly displays the concentration levels on-site, and it efficiently converts the detection signals into standard current signals for external output.

1.2 Product Description

The cutting-edge DA-750 transmitter is equipped with an easy-to-read LCD that displays gas concentrations by accurately converting the sensor's current and voltage signals. Through this process, it ensures stable and reliable readings, transforming them into standard current signals ranging from 4 to 20mA. These output signals can then be seamlessly transmitted to external devices, such as gas leakage alarm systems or controllers like PLC, DDC, Recorder and more. As a result, the DA-750 enables the creation of a sophisticated and integrated gas monitoring system, whether used independently or as a crucial component within a larger setup. The DA-750 transmitter boasts an integrated microprocessor, delivering a plethora of precise and versatile functions. Its built-in high-resolution A/D converter ensures the transmission of accurate indicated values. The incorporation of a HIGH / LOW 2-stage alarm contact point enables flexible interlocking with external devices. Moreover, the transmitter provides a 4 - 20mA external output, enabling the transmission of signals over long distances of up to 2.5km. Utilizing programmed menus, users gain the power to customize and set their desired parameters to suit individual environmental requirements. This user-friendly feature allows seamless adaptation to different monitoring conditions, enhancing the overall efficiency and effectiveness of the gas monitoring system.

2. Product Features

- **Manual Calibration Function**

This device can be calibrated as per requirement and types of gases. This device has very easy calibration process that makes the maintenance and operation easy. Calibration ensures that the gas detector maintains accurate and reliable measurements over time. It is typically recommended to calibrate gas detectors regularly

- **Built-in HD (High Resolution) A/D Converter**

The device is equipped with a high-resolution analog-to-digital (A/D) converter, ensuring precise and accurate conversion of analog signals into digital output. This technology enhances the accuracy of the output signal, resulting in reliable and trustworthy measurements.

- **User Programming**

The device allows users to customize various settings, such as the detection range and other functions, according to their specific requirements and preferences. This feature provides flexibility and adaptability to meet diverse monitoring needs.

- **Analog 4-20mA Transmitter**

With the analog 4-20mA output, the device enables stable and long-distance signal transmission of up to 2.5 kilometers. This ensures reliable communication and allows for extended signal transmission distances while maintaining signal integrity.

- **Alarm Output**

The device also features an alarm output capability. It is equipped with a Single-Pole Single-Throw (SPST) relay contact that provides a two-step alarm functionality. This means it can trigger two separate alarm states, denoted as alarm 1 and alarm 2, enabling effective alerting and response to gas detection events.

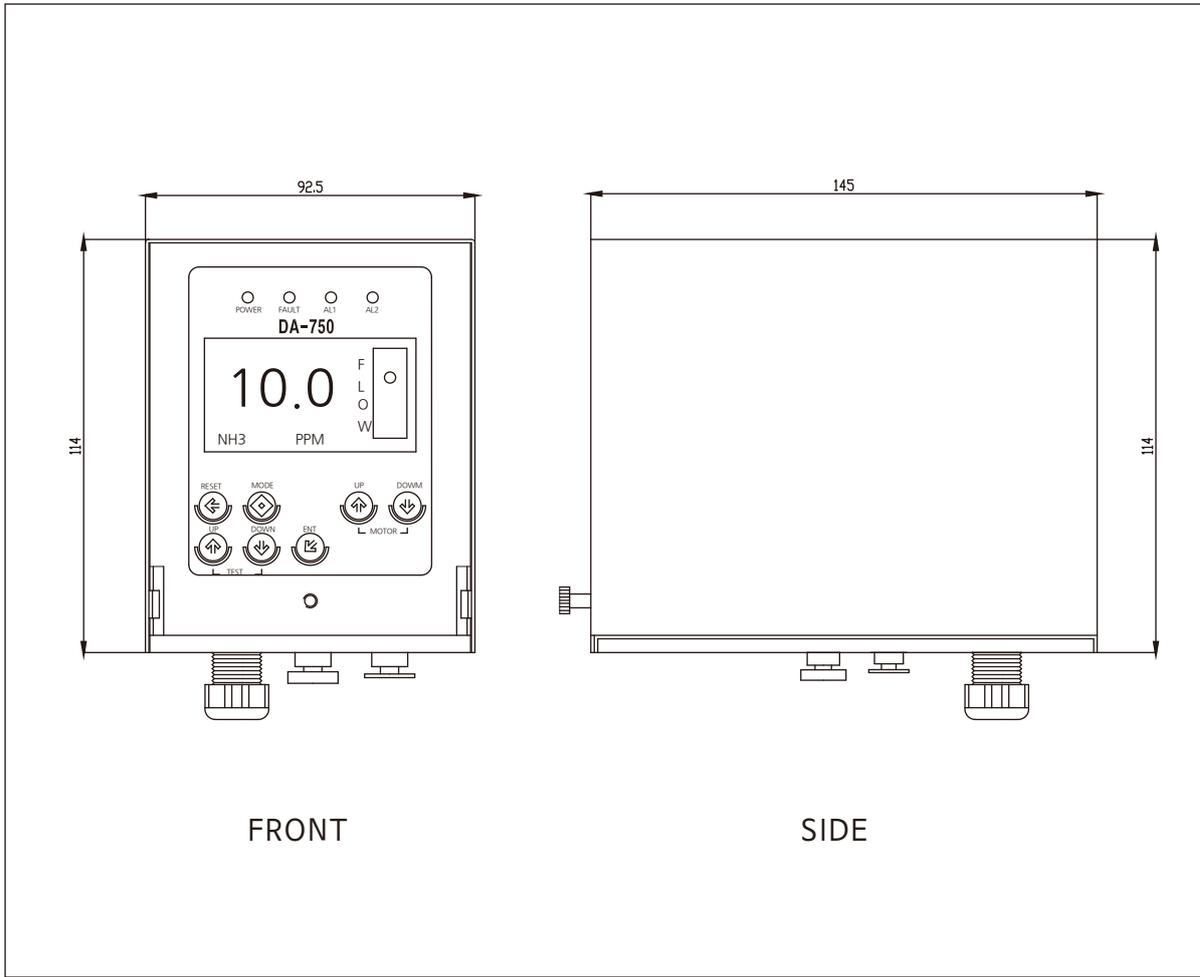

- **Diverse Output Signals**

This device provides a diverse range of output signals, facilitating seamless integration with various devices. It supports multiple output options, including an analog 4-20mA transmitter, Modbus RTU over RS-485 (optional), and a two-stage relay for alarms.

3. Product Specifications

Product Code	DA-750
Detection Method	Suction Type
Detection Principle	Refer the Gas list Section below
Display	LCD Display
Measuring Method	Suction Type
Sucking Capacity	1.5 L/min~2.5 L/min
Alarm Signal	LOW LED (RED) HIGH LED (RED)
Response speed & Accuracy	Within 0- 90sec, $\leq \pm 3\%$ /full scale
Measurement Range	Refer the Gas list Section below
Input Power	DC 20~30V,
Output Signal	4 ~ 20mA DC/ F.S
Detector Output	4-20 mA source or sink selectable 2mA = Fault 4-20 mA = Normal gas range 24 mA = Over range
Alarm Reset	Manual and Auto Reset
Ambient Temperatures & Humidity Range	-10°C ~ 50°C, 5 ~ 95% RH (Non-condensing)
Signal Wire	CVVS & CVVSB 1.25sq x 3 wire-shield Type
Installation Method	Wall Mounting Type
